

# Asuris Online Services for Providers

## *Asuris Online Services for Providers*

Asuris Online Services for Providers is provided at no cost to you, is easy to navigate and can be accessed 24 hours a day, seven days a week. If your staff does not have access to the Web today, it's a good time to add it. This Web-based tool provides easy access to important information, reducing routine phone calls to provider customer service. Asuris Online Services Web-based tool will provide you with:

- Secure access from any computer with Internet access
- Online registration
- Easy-to-use help screens
- HIPAA compliant application
- A list of subscriber family members
- Benefit verification, including copays and deductibles
- Provider directory summary, with navigation
- Claim and referral summaries with navigation functions
- New referrals
- Information on existing referrals
- Claim status
- Participating provider search

To utilize our system, your PCs will need an Internet browser with 128-bit encryption and an Internet Service Provider with a connection speed of 56K or higher. A cable or DSL connection is recommended.

Asuris Northwest Health will be using the services of the Washington Healthcare Forum sponsored OneHealthPort. OneHealthPort offers a single secure portal that simplifies access to local health care information. OneHealthPort helps health plans, hospitals and other health care organizations in the Northwest to attract and authenticate online users in a HIPAA compliant manner.

In addition, you can access:

- Medicare Advantage members (for all four plans, Washington, Utah, Idaho and Oregon).

Access the links within Asuris Online Services for Providers and follow the on screen instructions for our Medicare Advantage members.
